PROFILE SUMMARY

Experienced Front-End Software Engineer with expertise in building scalable, user-focused web applications. Proficient in JavaScript (ES6/7), React, and API integration, with a strong background in agile development and CI/CD. Passionate about leveraging modern web technologies to enhance developer and user experiences, including responsive design and Webpack

EDUCATION

2006 - 2010

KYIV INTERNATIONAL UNIVERSITY

- Bachelor's Degree in International Economics

2023 - 2024

BRAINSTATION

- Diploma, Web Development

TECHNICAL SKILLS

- JavaScript (ES6/7)
- React
- HTML5,
- CSS3
- Tailwind CSS,
- Node.js
- RESTful API Integration
- User Experience (UX) Design

SOFT SKILLS

- Technical Leadership
- Problem-Solving
- Agile Methodologies

WORK EXPERIENCE

Freelance

MAR 2024 - PRESENT

Vancouver, BC

Software Engineer

- Developed and optimized web features for e-commerce platforms using React, JavaScript, and responsive design, improving search visibility and user engagement.
- Led front-end architecture for scalable applications, integrating RESTful APIs to streamline developer workflows.
- Implemented Continuous Integration/Continuous Deployment (CI/CD) pipelines with Docker, reducing deployment times by 25% and enabling rapid iteration based on user feedback.

E'Mind Tek Inc.

NOV 2022 - DEC 2023

Vancouver, BC - Remote

Intermediate Software Engineer

- Built a secure authentication system (CUS Project) with real-time hardware sync, improving security and compliance in critical environments.
- Developed a scalable inventory system (Alouette Project) using Material-UI, boosting operational efficiency by 20%.
- Contributed to front-end architecture and performance tuning for responsive, cross-platform user experiences.

PayProGlobal (e-commerce)

DEC 2021 - FEB 2023

Toronto, ON - Remote

Intermediate Software Engineer

- Optimized front-end performance for a high-traffic payments page using React and Webpack, achieving 30% faster load times and 26% higher conversion rates.
- Led Continuous Integration/Continuous Deployment (CI/CD) adoption with GitHub Actions and Docker, improving team agility and deployment speed.
- Collaborated with backend developers and UX designers to deliver seamless, developer-friendly interfaces for web applications.

Softemy

MAR 2018 - DEC 2021

Kyiv, Ukraine -

Software Engineer

- Built scalable web solutions with React reducing latency by 15% through RESTful API integration and performance optimization.
- Partnered with backend teams to ensure robust data flow, decreasing user-reported issues by 20%.
- Implemented responsive design and modern UI practices using CSS3, delivering high-quality web applications.
